

DrumLOX

Returnable and Reusable
Packaging Solutions

Joinlox enabled Drum provides a stackable, returnable, reusable storage solution.

Joinlox enabled drum and barrel solutions delivers a truly returnable and re-usable solution for liquid and solids storage drums, barrels, buckets or pails.

DrumLox allows users to reduce their storage and logistics costs and environmental performance by being

able to disassemble, fully clean and dry if required, efficiently stack and return to point of production to be cycled over and again many times.

The unique strength, durability and integrity of

the sealed Joinlox join allows the like segments to be joined and used just like any other one-piece drum or barrel, but once emptied, can be easily disassembled in seconds. Suitable for high-volume, low-cost moulding manufacture.
